THURSDAY, October 2

DEATH OF GEN. ANDREW.—Ex-Gov. Andrew, of Massachusetts, died of apoplexy at his residence in Boston at six o'clock last evening. He leaves an honorable record as a patriot and statesman.

DISSENT

As the emigration from New England to the West has not ceased, and will not for a long time to come, the condition of the new States and the promise they hold out to new comers are matters of interest to us in this part of the world. The vastness of our western possessions is such that they will not for centuries be crowded with population as the old world is; and their rich resources held the promise of unlimited fields for industry of every kind. Crimped as the finances of some of the new States have been by the war, they are rapidly recovering, and new enterprises are undertaken which are so large in their prospective results that the people of the older States would hardly venture to undertake them without the leadership of the bold and venturesome pioneers who have become accustomed to contend with the hardships and enjoy the conquests of frontier life.

Probably no other State of the Union combines in itself so many advantages for settlement as Missouri. The future of that State is highly promising. It is probably receiving a larger number of immigrants than any other of the rapidly growing western States. Its rich fields and abundant mineral resources began to draw settlers as soon as slavery was abolished, and the movement has been growing more general with every succeeding year. Though desolated in some portions by the war, it has exhibited wonderful recuperative power. In its finances it is coming nearer and nearer to a sound basis, for although it has a heavy debt, there is every prospect that its obligations will be promptly met. A late report shows that after paying two and a half millions of coupons it has over a million dollars in the treasury that will not be needed for some time to come. Nature designed Missouri for a great State, and even war and slavery have failed to defeat the plan.

The Indian Peace Treaties.

The treaty made by the Indian Commissioners with the Kiowa and Comanche tribes on the 21st inst., gives them about six thousand square miles (three and a half million acres) of land, embraced between the north fork of the Red River and the Red River, beginning at the intersection of the thirty-fifth parallel with the ninety-eighth meridian, embracing the southwestern corner of the present Indian territory, with a fraction from the Texas strip, now estimated at four thousand persons, or about eight hundred and eighty. This land will therefore give eight hundred acres to each man, woman and child. It is also provided that these tribes shall induce their brethren, the Comanches in Northern Texas, to come and live with them, and if they succeed that the United States will enhance their reservation, adding a quantity of land sufficient to give each person of the remaining Comanches that have been induced to come, three hundred and twenty acres. This will leave a reservation of country on the Texas frontier free from the Indians, and open the way to civilizing a raving band. On this reservation there are several bands of the Comanches already farming, and by Colonel Peurybacker and others it is proposed to build an agency house, a warehouse and other buildings, for a teacher, farmer, miller, physician, &c., and that these persons be furnished by the Commissioners for the Indians, and live on the reservation and aid them.

In lieu of the annuities provided under the treaty of 1853, it is proposed to give each Indian on the reservation annually a suit of clothes, consisting of coat, trousers, hat and shoes, and in addition to this, that \$25,000 be given annually, in such articles as the Indians most need. Several other provisions are made to furnish seeds and agricultural implements to such Indians as may commence farming. The Indians agree to let all the railroads be built, and especially the Smoky Hill and Platte roads. They also agree to keep lasting peace; to capture no women or children, to attack no more trains, and to cease killing men; and it is also agreed to allow them to hunt on the old reservation, south of Arkansas, until the settlements drive them away from that hunting ground.

Fear of the Negroes.

A special dispatch from Washington says that the prospect of a negro outbreak in the South is beginning to excite serious alarm in official quarters there. Several prominent gentlemen from the South have recently called upon the President and represented that the negroes were undoubtedly possessed of arms and ammunition in large quantities. They state that the blacks are organizing with hostile intentions, and contemplate the slaughter of the whites at the first favorable opportunity.

These gentlemen urged the President to order a larger number of troops to the military districts, and thus by a timely display of power overcome the disaffected blacks. Nothing short of this, they think, will prevent an early uprising of this half-civilized class, and the reputation of all the armies of San Domingo. One of these gentlemen protests that the war of caste will commence before the expiration of the present month, unless the Government adopts strong measures to prevent such a calamity. The negroes throughout the South have a thorough understanding, and have even fixed upon the impeachment of the President as the proper moment for a bloody uprising.

There is reason to think that the government entertains most serious apprehensions. The whites are entirely unarmed and defenseless, while the blacks have an abundance of offensive weapons picked up from the battle fields during the war, and since purchased by money hoarded away. Scarcely a negro cabin in the South is without arms enough for four or five persons. The President will undoubtedly take steps for the protection of the whites, but should

be prepared to meet the present situation, and should be prepared to meet the future situation.

State Temperance Convention.
Delegates from the various churches and temperance societies of this State gathered in Roger Williams, in Providence, Tuesday, for the purpose of organizing a State Temperance Union.

The meeting was called to order at ten o'clock, a. m., by Hon. A. C. Barstow, of Providence. Rev. Seth Reed, of Providence, was elected temporary President, and Rev. F. Denison, of Westerly, and Rev. D. H. Ely, of Providence, Secretaries.

A business committee consisting of two delegates from Providence county, and one from each of the other counties, was appointed as follows: Hon. A. C. Barstow, Hon. W. B. Lawton, Rev. C. H. Moseley, Rev. John Jordan, Nathaniel Sanders and Horatio Berry.

Messrs. S. H. Nickerson, Philip D. Stines, James Davis and Rev. C. H. Plummer, were appointed a committee on credentials.

After the committees had retired, remarks urging upon all the necessity of greater activity in the temperance cause were made by Rev. Messrs. V. A. Cooper, James O. Barney and S. Reed, and Mr. B. B. Dyer and others.

On motion of Mr. Barstow, the temporary officers were made permanent.

Hon. A. C. Barstow, from the Business Committee, reported the following resolutions, which, after considerable discussion, were adopted *unanimously*:

Resolved, That we recognize with devout thanksgiving to Almighty God, the token of a rising interest upon the subject of temperance, among the people of this State, and that we hold this gathering for the purpose of organizing a State Temperance Society, as one of the marked expressions of this interest.

Resolved, That intemperate use of food or drink which is necessary or useful to men in health, and the evil use of all articles known to be poisonous or injurious.

Resolved, That intoxicating drinks are never beneficial to men in health, but are always injurious; and, therefore, in the language of Webster, the greenleaf philosopher, those who "habitually use these drinks with or without intention," are "intemperate."

Resolved, That the moderate use of intoxicating drinks endangers the safety of the individual, and, through the power of example, exerts an evil influence upon society.

Resolved, That a pledge to total abstinence from all intoxicating drinks is justified by reason and revelation, by a proper self-love, and the equal love we owe our neighbor.

Resolved, That as youth is the seed-time of life, it becomes us to scatter the good seed of Temperance broadcast upon the youthful mind, and also to watch and water it with all diligence, lest while we sleep enemy come and sow tares.

Resolved, That we urge upon the friends of temperance in the State the organization of local societies in all our towns and school districts, and that through their earnest efforts be made to pledge the people, and especially the children and youth, to total abstinence.

Resolved, That the traffic in intoxicating drinks is an immorality and a crime; that all who engage in it are exposed to the "vice" pronounced upon him "who putteth the bottle to his neighbor's lips and maketh him drunken;" and that all who license it, lease buildings for it, or otherwise aid it, become accessories to the crime, and thus must expect to share in the "vice."

Resolved, That the traffic in articles which are both necessary and dangerous (like gunpowder) may be licensed as a means of confining them to the hands of careful men; but articles which are never necessary but always dangerous (like lottery tickets, obscene books and prints and intoxicating drinks) should be put under the ban of legal prohibition, and the prohibition should be strictly enforced.

On motion of Rev. Mr. Fay, it was voted that a committee be appointed to draft a constitution for a State society. The chair appointed the following: Rev. C. H. Fay, Rev. V. A. Cooper, Rev. J. H. Lyon, P. L. Berry, Esq., Rev. A. D. Vose, Messrs. A. D. Springer and Charles L. Carpenter.

The committee on credentials reported a list of delegates. The whole number of members of the Convention was 271, including 44 ministers, and representing fifty churches and eighteen temperance societies.

Adjourned to two o'clock p. m.

AFTERNOON.
The Convention re-assembled at two o'clock. The Committee appointed to draft a constitution reported, in accordance with their instructions, a series of articles in which the organization is called the Rhode Island Temperance Union. The articles were, after considerable discussion, adopted *unanimously*.

President—Hon. Amos C. Barstow.
Vice Presidents—Rev. S. C. Brown, D. D., of Warren; Benjamin Mumford, of Newport; F. Denison, of Westerly; Moses Fifield, M. D., of Warwick; and Rev. John Jordan, of Woonsocket.

Secretary—Rev. C. H. Plummer, Providence.
Treasurer—Theophilus Salisbury, Esq., Providence.

Executive Committee—Rev. V. A. Cooper, Hon. Edward P. Knowles, Charles L. Carpenter, Henry Woodworth, Jas. H. Carter, of Providence; James Davis, of Pawtucket; William B. Lawton, of Warren.

Mr. Barstow, in accepting the position of President, said that he meant to give the cause his undivided interest and support, and that he wanted active supporters. He said that money was wanted for the efficient accomplishment of the work in which they were engaged. He hoped that \$3000 would be raised within a few weeks, and said that

that amount was raised he was ready to

Money was collected during the forenoon. Rev. V. A. Cooper was authorized to obtain subscribers to the Constitution, and to a paper for voluntary contributions.

Remarks in favor of energetic action in the cause were made by Rev. Messrs. A. H. Granger, M. D., S. B. Denison, and others.

After the transaction of some business of minor importance, the Convention adjourned.

Newport, Oct. 30.

HOWARD SMITH,
Agent for Co.

THE DIFFERENCE.—Much has been said in relation to the superiority of the large boats of the Bristol line as sea-going steamers. This matter has been tested, and the Newport steamers proved to be far superior.

Tuesday night, in making the passage between Bristol and New York, the *History* steamer *Bristol* had a large portion of her upper works stove in and her main deck started, while men had to be employed to hold on to and secure the movable things in the saloon. She was a real spectacle in the water, when she arrived in New York.

The *Newport*, which went through the same night, arrived without so much as a splinter being started, or any of the passengers inconvenienced. The *Newport* had a very heavy freight.

VESSEL ASHORE.—Schr. *Allan Middleton*, Jr., Ames, from Bristol for Newbern, N. C., went ashore on the Damppling rocks, last night, where she remains with her fore foot hard and fast on the rocks. A boat's crew from the revenue cutter *Cornford* have gone to her assistance, and the steamer *City of Newport* made an unsuccessful attempt to haul her off, this morning. A tug has been sent for from Providence, and the vessel will probably be got off the next tide without damage. She is in ballast, and went on about half-past 5 o'clock last night.

The *Boston Traveller* says that Rev. S. E. Evans, of Chelsea, Mass., has accepted a call from the Congregational Church in East Providence, R. I.

ACROSS THE SIERRA NEVADAS

THE
Central Pacific Railroad.
—
"THE WESTERN HALF"
OF THE
GREAT NATIONAL TRUNK LINE
Across the Continent,
BUILT AND SUPERINTENDED BY THE LAND AND SURVEYING CO.

changers to hold the great Mining Exposition of the Pacific, and will meet and connect with the roads now building out of the Rocky Mountains. About 100 miles are now built, equipped and in running order. The great trunk line, the Great Northern, will be built, and the trunk roads finally across the mountains to be built in the Great Salt Lake Valley, where further progress will be rapid. Some 1,000,000 tons of equipment and material are being for 300 miles of road and 10,000 men are employed in the construction.

The local business upon the completed portions represents all products estimate. The figures for the quarters ending August 31 are as follows in Gold:

EARNINGS,	EXPENSES,	EARNINGS,
\$487,579 64	\$36,543 47	\$401,031 1

The Company's interest liabilities during the 2007 period were less than \$100,000.

...the United States will build and control it. Assuming that they will build and control it, the railroad line between San Francisco and the Mississippi River, is now being probable, the United States will have invested in the completion of \$3,300,000,000, or at the average rate of \$3,300,000,000 per mile, including an absolute grant of 10,000,000 acres of the Public lands. By becoming a joint line for the magnificent enterprise, by giving its stock to the people of the First Republic...

The Company offer for sale, through us, their
First Mortgage Thirty-Year 'Six
 Cent Coupon Bonds

Principal and Interest Payable
Gold Coin,
in New York City. They are in sums of \$1,000 (\$500) each, and contain gold coins attached, and are payable for the principal at 95 per cent, and accrued interest from July 1st added, in currency, at which they shall be payable.

Nine Per Cent. upon the Investment.
These bonds, authorized by act of Congress, bear a dividend as the work progresses, and to the

Peerless Cooking Stove

IT TALKS what the Boston Journal says of
 its peerless qualities:

Among the numberless merits claimed for this

even, making it a resting rather than a baking surface. It is formed by a peculiarly constructed fabric, which lets the air as it passes down below the pot and into the oven, causing the oven to heat perfectly and evenly, a great desideratum in a cooking stove. It offers the perfect control which is kept over the fire, and its cleanliness. The stove works equally well with coal or wood. There are of different sizes, and are made plain or ornamented, the latter being more expensive.
